

The `academicons` package

High quality icons of online academic profiles

Diogo Fernandes*(\LaTeX code)
James Walsh (font and icons design)

v1.9.6, released on the 17th of September, 2025

Abstract

The `academicons` package provides specific \LaTeX bindings with the free *Academicons* font, allowing access to 146 high quality icons of online academic socials.

1 Description

The `academicons` package provides access in \LaTeX to 146 high quality icons of online academic socials included in the free *Academicons* font. This package works with both X_{TeX} or $\text{Lua}\LaTeX$ by using `fontspec` to load the included font, as well as with $\text{pdf}\LaTeX$ by loading a Type 1 converted format of the original font.

The *Academicons* font was designed by James Walsh and released¹ under the open SIL Open Font License². This package is a redistribution of the free *Academicons* font with specific bindings for \LaTeX . It is inspired and based on the `fontawesome`³ package.

2 Usage

`\aiicon` The generic `\aiicon` macro takes as mandatory argument the lowercase $\langle name \rangle$ of the desired icon. Icons can also be accessed directly by their respective macro in CamelCase. For example, `\aiicon{googlescholar}` yields the same result as `\aiGoogleScholar`. The full list of icons with their respective names and direct macros can be found in the next pages.
