# \{Simpler-Wick\} 

Simpler Wick Contractions

Version i.o.o ith December 2015
by Joshua Ellis

## $\longdiv { \square }$ <br> Simpler Wick Contraction

## <br>(\wick\{\c1Simp\c2le\c3r\ \c2Wick\ \c3Contractio\c1n\}<br>)

## Contents

I Introduction ..... II.I InstallationI
2 Usage ..... I

## I INTRODUCTION

This package provides simple way of inserting Wick contractions．
If you have any suggestions or have found any bugs，please feel free to create a new issue or pull request on the Github page：https：／／www．github．com／JP－Ellis／simpler－wick．

## I．I Installation

In order to use this as it is，simply download simpler－wick．sty and place it in the same directory as your rm{E}}\mathrm{X}\)fileandincludeitusingtheusual\usepackage\｛simpler－wick\}.Alternatively,itisalsopossibletoinstallsimpler-wicksystem－widebyplacingitinsideTEX＇ssearchpath（whichwillvarybasedonyouroperatingsystem）．Thispackageisalsoavailablethroughctan．undefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefined

## 2 UsAGE

The package is imported by adding ckage\｛simpler－wick\}toyourpreamble.Inyourmathenvironment,youcannowusethe\wickcommandincombinationwith\c：undefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefined

```
\begin{equation}
    \wick{\c\phi A \c\phi} 校 
\end{equation}
```

If you wish to have multiple contractions，then follow $\backslash c$ with a number between I and 9 ；the first occurrence of $\backslash c N$ will start the Wick contraction，and the second occurrence of $\backslash \mathrm{CN}$ will end it．After you have ended a contraction， \cN start another contraction．

```
\(\backslash\) begin\{equation\}
    \wick\{
        \c1 a \c2 b \c3 c \c1 a \c4 d \c1 e
        \c1 e \c1 a \c2 b \c3 c \c1 a
    \}
\end\{equation\} }
    \(\longdiv { \Pi \sqcap \sqcap }\)
    abcadeeabca
```

The package has two options：sep and offset．sep is the distance separating each level and offset is the base offset． By default，ashoffset=1\)em，buttheycanbechangedgloballybyspecifyingthemaspackagevariables：\usepackage［sep＝5pt，offset＝1．5em］\｛simpler－wick\}Oryoucanspecifythemasoptionalargumentto\wick．ThisisparticularlyusefulifyouhavesometallsymbolswithinyourWickcontraction：Bydefault,\sep=3ptand\offset=1em,buttheycanbechangedgloballybyspecifyingthemaspackagevariables:undefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefinedundefined

```
\begin{equation}
```

$$
\begin{equation}
    \wick[offset=2em]{\c\phi \int \frac{dx}{x} \c\phi}
    \wick[offset=2em]{\c\phi \int \frac{dx}{x} \c\phi}
\end{equation}
$$

\end{equation}
